

REMARKS

Applicants respectfully request reconsideration of the application, as amended, in view of the following remarks.

In **amended Claim 1** the **adsorbent** is selected from the group consisting of a **strongly basic anion-exchange resin, and a weakly basic anion-exchange resin**.

In contrast, Barker et al (CA 2,052,435) fail to disclose or suggest the use of a strongly basic **anion**-exchange resin, and a weakly basic **anion**-exchange resin. All that Barker et al disclose is a “solid **non-ionic** polystyrene adsorbent.” See Amberlite XAD-4 and XAD-16 at page 15, lines 4, 17 and 22 of Barker et al.

Therefore, the rejection of Claims 1, 4-9, 11 and 13-20 under 35 U.S.C. § 102(b) as anticipated by Barker et al is believed to be unsustainable as the present invention is neither anticipated nor obvious and withdrawal of this rejection is respectfully requested.

The rejection of Claims 1 and 4-19 under 35 U.S.C. § 112, 2nd paragraph, is obviated by the amendment of Claims 1 and 10 and moot with regard to cancelled Claim 12.

The rejection of Claim 20 under 35 U.S.C. § 112, 2nd paragraph, is respectfully traversed. “Degree of bitterness” is explained in detail on page 19, lines 15-25, of the specification. Accordingly, the scope of this phrase is clear from the specification. This rejection should be withdrawn.
